- What do you imagine the menu of the program will look like (Do you need to type or select) ?
- What are the most frequently used options you are thinking about ?
- What kind of information should be stored for Books and Customers ?
- Does the output follow a specific format ?
- Can you provide an example import file for Books, Book Copies and Customers?
- What file format should the program be able to handle?
- How to calculate the penalty fee?
- Do you want to be able to modify the fee calculation in the future?
- Should all the information (borrowing period, amount of the fee, etc.) should be preset for you or do you want to have the possibility to change them?
- Will there be any specific integration with other apps or systems that we must be aware of as a part of the technical infrastructure?
